WORK EXPERIENCE

PrimeIT

Nov 2024 - Current

PHP Developer

Activities:

- Development and update of the internal monitoring team's website, which receives data from an Oracle database and displays the status of the company's applications over the last 24 hours.

Superprof

Feb 2024 - Current

Freelance teacher

Focused on transforming the learning journey into a practical and engaging experience, using a powerful set of technologies such as **PHP**, **HTML**, **CSS**, **JavaScript**, **React**, **GitHub**, **NodeJS**, **Tailwind**, and **SASS** to empower students to develop dynamic and functional web applications.

Activities:

- Development of a comprehensive CRM study project, including the structuring of a **MySQL** database, implementation of a robust REST API, and creation of a functional front-end with **Laravel**. Extensive experience in the entire system creation cycle, from data organization to user interface, resulting in an efficient and adaptable solution for customer management.
- Structured and personalized study planning on the **LeetCode** platform to enhance problem-solving skills and programming logic, focused on preparing students for technical challenges in selection processes.

Moonlight - Comunicação Global | Remote

Aug 2021 - Aug 2024

Full Stack Web Developer

Activities:

- Development of 3 online stores that impacted 100% of sales and business growth for clients, creating positive experiences for consumers. Implementation was carried out using **PHP**, **JavaScript**, **JQuery**, **HTML**, **CSS**, and **MySQL**, resulting in effective and scalable e-commerce solutions, with a focus on performance and customer satisfaction.
- Development and updating of features in a CMS for configuring information in online stores and applications. Utilization of an internal framework based on **Laravel** and structured in **MVC**, optimizing processes and implementing efficient solutions for digital content management.
- Leadership in the development of a complete system for managing workshop processes aimed at accelerating 70% of the process and eliminating 100% of the manual notes currently used, including a CMS, RESTful API, and mobile application. Implementation of the CMS with **PHP**, **JavaScript**, **HTML**, **CSS**, **JQuery**, and **MySQL**, ensuring an intuitive interface and robust functionalities. RESTful API in **PHP** for efficient integration with the mobile application, developed with **Framework7**, **React**, and **Cordova**. Solid experience in project leadership and creating integrated and scalable solutions.

Inside Sistemas

Nov 2015 - Oct 2018

Helpdesk / Developer

Activities:

- Customer support with assistance in installations and troubleshooting questions about the Service System. This experience enhanced communication and problem-solving skills, ensuring user satisfaction and success.
 - Participation in a project team to create interactive tutorials aimed at reducing customer support tickets by 30%. Identified a lack of information on the help site and proposed an update to the platform. Responsible for the creation and maintenance of the new site in **WordPress**, enhancing self-service and strengthening the support base.
 - Identification of an opportunity to create an internal website, centralizing information from various departments of the company and optimizing employee access. Developed the platform in **WordPress**, responsible for the maintenance and content updates, ensuring accuracy and accessibility of information. This initiative resulted in a 70% improvement in communication and efficiency of internal processes.
-

EDUCATION

Bachelor's degree in game design

Sep 2018 - Jul 2021

Bragança Polytechnic Institute

Development of technical-scientific knowledge and practical skills in game design, audiovisual production, media production, visual arts, computer science, and communication. Learning in game development with **Unity** and **C#**, encompassing the creation of mechanics and interactive experiences. Courses in programming logic with **Python** and Object-Oriented Programming with **C#** enhanced the ability to solve problems and build efficient solutions for complex projects.

Technology Degree

Mar 2023 - Dec 2023

DNC School

Development of technical knowledge in web development, using **JavaScript (NodeJS)** and **TypeScript**, along with frameworks like **React**. The learning encompasses the creation of APIs, modelling of **relational and non-relational databases**, and **unit tests**, applied in Full-Stack projects for scalable and integrated solutions.

English

Jun 2023 - Jun 2024

Speak-up

English

Sep 2024 - Oct 2024

EF Manchester

SOFT SKILLS

Proactivity, determination, communication skills, problem-solving, self-directed learning, teamwork, adaptability, critical thinking, ability to give and receive feedback.
